I N T R O D U C T I O N

This bibliography was compiled by P. S. Ross & Partners in 1974 as part of work being done on the Northern Alberta economy by the Northern Development Group.

Schick/Swanson Library & Information Consultants Ltd. prepared this compilation for publication and adapted it to a machine readable format.

This bibliography contains references related to the Northern Alberta economy geographically defined by census divisions 12 - 15. The majority of the references cover the time period 1965-1974. Some earlier references have, however, been included for historical purposes.

To assist the reader in locating information, references in most cases are listed alphabetically by author within each broad subject section. If there is no author listed for an item, the reference is listed alphabetically by title and will precede the author entries within each subject section. Full subject and personal and corporate author indices follow the text. For a further explanation of the entry format see page ii.

The designated library location for each entry is included to aid the reader interested in obtaining a specific reference. The material will, however, often be held in more than one library, to which the reader may have access.

We gratefully acknowledge the assistance of the Boreal Institute for Northern Studies, especially Mrs. G. A. Cooke, for use of the Computerized Annotated Bibliography System (CABS) program.
